

# Global Ecologies – Local Impacts

*The Sixth Biennial Conference of the Association for the Study of Literature, Environment & Culture, Australia & New Zealand (ASLEC-ANZ) in collaboration with the Sydney Environment Institute (SEI).*

This conference will explore the interactions and tensions between local and global spheres of environmental change. In the process we hope to encourage new dialogues, collaborations and projects between the different sub-disciplines that make up our burgeoning and evolving fields of study.

Individual papers and interdisciplinary panels will address a wide range of themes in the environmental humanities, arts and social sciences.
